Essays exploring the relationship between gender, technology, and politics today...

The Beautiful Warriors. Technofeminist Practice in the 21st Century brings together seven current technofeminist positions from the fields of art and activism. In very different ways, they expand the theories and practices of 1990's cyberfeminism and thus react to new forms of discrimination and exploitation. Gender politics are negotiated with reference to technology, and questions of technology are combined with questions of ecology and economy. The different positions around this new techno-eco-feminism understand their practice as an invitation to take up their social and aesthetic interventions, to join in, to continue, and never give up.
