transversality

transversal texts consists of a site for publishing books and e-books in multiple languages, the multilingual web journal transversal, an experimental audio section, and a blog covering current news from the worlds of translation, social movements, artistic practices, and political theory. transversal texts is production site and platform at once, territory and stream of publication - the middle of a becoming that never wants to become a publishing company.

A selection of multilingual texts and audios:

Journals
Molecular Revolts in Europe
